GOAL! The Unique Card Game for One or Two Players

This Windows® card game is played on a football gridiron with standard 52-card decks. Combining elements of football and the card game of blackjack, you can play it as a solitaire game against the Computer Coach or two players can play against each other. The game requires no internet connection and is free of all advertisements.

How to Order

Our software is sold through our Shopify Webstore. All major credit cards are accepted. After your payment is approved, you will receive an email with a download link to an executable containing an Install Wizard to guide you through installation. You can run the Install Wizard immediately or you can save the executable on your PC or on a flash drive and then install the software at any time by clicking the Installation Setup Icon. There are no annual renewal fees.

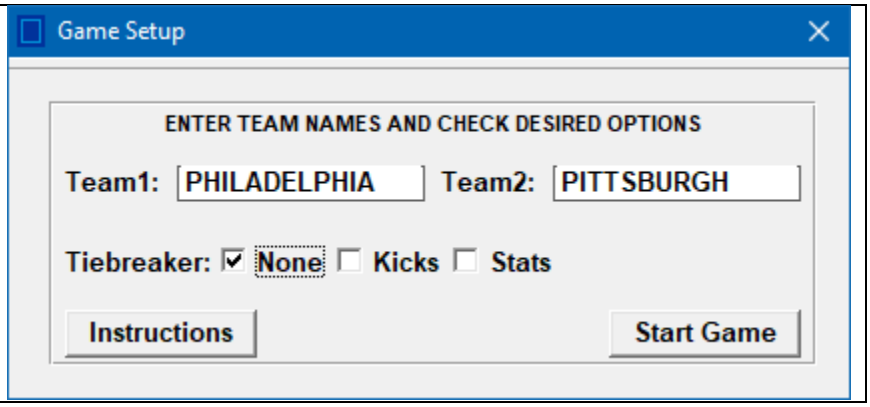
All Time Game Records

To notify The Golasso Company about a game record, save the Statistics Window and send it via email to service@thegolassocompany.com. Current verified game records for one team:

Most Goals: 7
Yards Gained: 360
Rushing Yards: 231
Average Yards Per Rush: 6.27
Passing Yards: 242
Pass Completions: 16
First Downs: 27

Launching the Program

After installation, the icon shown below will appear on your desktop. Click on the icon to launch the game.



Game Setup

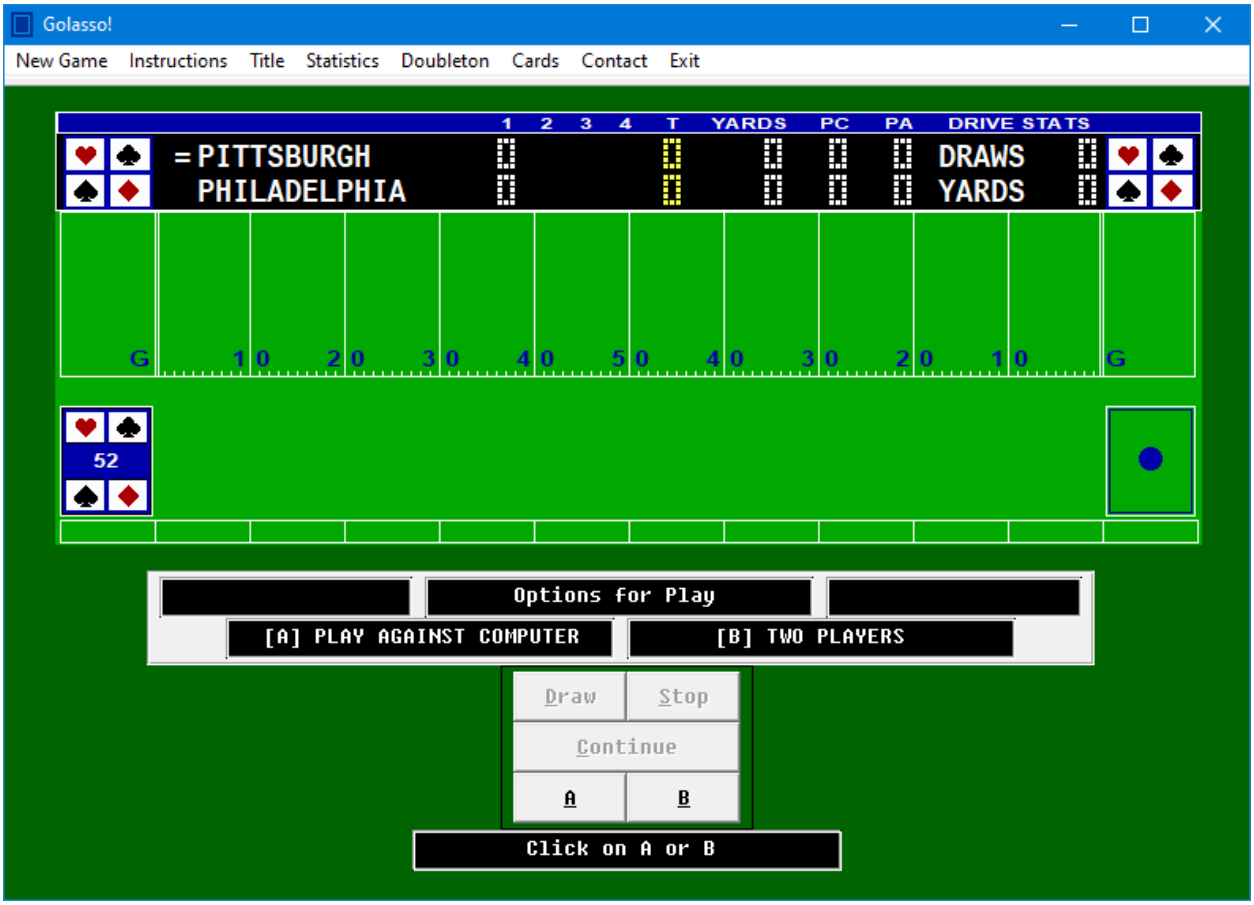
When the game is launched you can specify names of the two teams. If names are left blank, the names will appear as TEAM1 and TEAM2. Also select the type of tiebreaker, if any, to use for the game. Click the **Start Game** button to begin the game. Drawing a Face Card starts a Pass Play. Drawing a Pip Card starts a Rushing Play. Subsequent draws determine the result of the Play and the location of the ball. If the ball is advanced to the Goal Line, a goal is scored (one point). Beware of drawing the Queen of Spades, which can result in a fumble or an intercepted pass.

Software Specifications

The software works exclusively on Windows® Operating Systems. It requires 2 MB on your hard drive.

©2022 The Golasso Company. Windows® is a registered trademark of Microsoft Corporation.

When the game starts, the software will shuffle the first of four decks (one deck per quarter) used for the game. Select if you want to play solitaire against the Computer Coach or if two players are competing.



Does the Computer Coach Cheat?

No, the Computer Coach does not cheat but does have a perfect memory of what cards have been drawn during a quarter. It uses its perfect memory to make decisions during the game. You can also check on what cards have been drawn by clicking **Cards** on the Menu Bar. On pass plays, based on a random factor, the Computer Coach will sometimes be very cautious about choosing to draw another card, and sometimes the Computer Coach will keep drawing cards.
